

Unlocking New Horizons with SABCA's Light UAS Operator Certificate

Unlocking New Horizons with SABCA's Light UAS Operator Certificate

SABCA's Light UAS Operator Certificate (LUC) has proven to be the cornerstone of an extraordinary cross-border UAV mission, setting a new standard for innovation and efficiency in the industry.

With the power to self-authorize, our team can pivot swiftly, accommodating even the most demanding customer schedules. This pivotal advantage not only streamlines operations but also empowers industrial UAV applications to reach new heights and redefine the realm of possibilities.

This remarkable cross-border endeavor is just a glimpse of a larger, international project unfolding in the vast expanse of international waters. But that's not all. Our next destination is within the airspace of one of Europe's busiest airports, where we'll showcase the true prowess of SABCA's Light UAS Operator Certificate. Get ready for groundbreaking flights that will leave you in awe!

Thank you [DEME Group](#) for facilitating this operation !
